Winter, H. and Meckelburg, H.
RESEARCH ON THE ADHESIVE BONDING OF STEEL.
[1963] [34p] (figs omitted) 10refs
Order from SLA $3.60 63-20346

Trans. of der Stahlbau (West Germany) 1961 [v. 30] no. 1, p. 14-23.

DESCRIPTORS: *Steel, *Bonding, Adhesives, Stainless steel, Surface properties, Mechanical properties.

The results of the investigations show that a successful adhesive bonding of steel is feasible. The knowledge and experiences gained in aluminum-bonding are applicable. However, different characteristics of material and other application procedures will add new factors. For example, the spraying with blasting corundum by the "Vacu-Blast" method can be regarded as a most effective pretreatment of adherend surfaces.
